
A
-log10(FDR-adjusted p-value)
6
5
4
3
2
Number of genes in a GO term
10
100
1000
Jaccard index between two gene sets or fraction of gene set belonging to a given family
0.01
0.10
0.20
0.50
focal adhesion
synapse
AluSz
kinetochore
protein kinase binding
cell surface
nucleolus
cell division
G protein-coupled receptor signaling pathway
histone binding
peptidyl-prolyl cis-trans isomerase activity
cytoskeleton actin binding
catalytic step 2 spliceosome
NLS-bearing protein import into nucleus
sensory perception of smell
AluJb
actin filament
protein transport
DNA-directed RNA polymerase activity
translation
G protein-coupled receptor activity
mRNA processing
MIR3
FLAM_C
DNA metabolic process
negative regulation of microtubule depolymerization
positive regulation of double-strand break repair
AluSg7
mRNA splicing, via spliceosome
AluSg
AluSp
intracellularly calcium-gated chloride channel activity
mitochondrial inner membrane
AluYe5
DNA repair
AluSc
AluSx1
phosphatidylethanolamine catabolic process
mitotic sister chromatid cohesion
AluSq
Golgi cisterna membrane
cis-Golgi network
monoatomic ion channel complex
subcortical maternal complex
DNA damage response
fibrillar center
AluYk2
late endosome
AluSx
Golgi organization
AluY
AluYa8
protein serine/threonine/tyrosine kinase activity
cyclosporin A binding
AluSx4
Golgi cis cisterna
spliceosomal complex
chromosome
neutral amino acid transport
detoxification of copper ion
ribonucleoprotein complex
cellular response to cadmium ion
AluJr4
AluSq2
Cul2-RING ubiquitin ligase complex
regulation of DNA replication
olfactory receptor activity
MIRc
mitochondrial matrix
negative regulation of growth
AluSx3
MIR
glutathione catabolic process
mRNA binding
AluJr
U2-type prespliceosome
Ino80 complex
RNA splicing
protein ubiquitination
cellular response to copper ion
precatalytic spliceosome
cholesterol binding
detection of chemical stimulus involved in sensory perception of smell

B
RNA polymerase II CTD heptapeptide repeat S5 kinase activity
cyclin L-CDK11 complex
RNA polymerase II CTD heptapeptide repeat S2 kinase activity
all-trans-retinol dehydrogenase (NADP+) activity
11-cis-retinol dehydrogenase (NADP+) activity
cellular detoxification of aldehyde
nucleoside triphosphate diphosphatase activity
UTP diphosphatase activity
ERV24_Prim-int
LTR57-int
MER65B
L-lysine N-acetyltransferase activity, acting on acetyl phosphate as donor
PrimLTR79
peptidyl-lysine N6-acetylation
MER57-int
nicotinic acid receptor activity
MER83B-int
protein serine/threonine phosphatase inhibitor activity
PABL_A-int
LTR47B2
zinc chaperone activity
LTR54B
MER65-int
MER65A
MER34-int
LTR86C
heterophilic cell-cell adhesion
MER57B2
MutLalpha complex binding
negative regulation of cell differentiation
sensory perception of smell
HERV35I-int
N-formyl peptide receptor activity
Cul2-RING ubiquitin ligase complex
glutamine N-acyltransferase activity
MLT1L
LTR26
LTR44
beta-1,3-galactosyl-O-glycosyl-glycoprotein beta-1,6-N-acetylglucosaminyltransferase activity
LTR101_Mam
MER57A-int
termination of RNA polymerase II transcription
MER76-int
MER41-int
LTR12C
MER54B
nucleosome
RNA polymerase II CTD heptapeptide repeat phosphatase activity
LOR1-int
MER110A
female pregnancy
ubiquitin-like ligase-substrate adaptor activity
peroxisomal matrix
fatty acid ligase activity
antigen processing and presentation of endogenous peptide antigen via MHC class I via ER pathway, TAP-independent
zymosterol biosynthetic process
LTR23-int
LTR8B
homophilic cell-cell adhesion
MER65D
nucleosome assembly
MER11A
bile acid metabolic process
structural constituent of chromatin
MER34
MLT-int
decanoate-CoA ligase activity
benzoate-CoA ligase activity
ERV3-16A3_I
beta-2-microglobulin binding
peroxisome
MER39B
MER31B
antigen processing and presentation of endogenous peptide antigen via MHC class Ib
MLT1F1
LTR13
fatty acid metabolic process
mRNA cleavage and polyadenylation specificity factor complex
MHC class I protein complex
cis-Golgi network
alpha-linolenic acid metabolic process
MER4CL34
negative regulation of proteolysis
lipoprotein metabolic process
oxidoreductase activity, acting on paired donors, with oxidation of a pair of donors resulting in the reduction of molecular oxygen to two molecules of water
LTR12B
MLT1H2
LTR1
formation of cytoplasmic translation initiation complex
eukaryotic 43S preinitiation complex
acyl-CoA 6-desaturase activity
Golgi cis cisterna
MER65C
eukaryotic translation initiation factor 3 complex
clearance of foreign intracellular DNA
DNA helicase activity
LTR1C3
LTR2B
negative regulation of single stranded viral RNA replication via double stranded DNA intermediate
DNA cytosine deamination cytidine to uridine editing
MER21A
MER49
arylsulfatase activity
alpha-amylase activity
pentose-phosphate shunt, non-oxidative branch
LTR25-int
peptidyl-prolyl cis-trans isomerase activity
hair cycle
LTR16A
chloride ion binding
negative regulation of peptidyl-lysine crotonylation
LTR26E
LTR16E1
MER4-int
cation binding
LTR25
MLT1A
RNA polymerase II transcription regulatory region sequence-specific DNA binding
cellular response to jasmonic acid stimulus
histone H3K4me3 reader activity
ketosteroid monooxygenase activity
transcription cis-regulatory region binding
LTR24C
LTR12D
MST-int
trans-1,2-dihydrobenzene-1,2-diol dehydrogenase activity
MER57E3
xenobiotic metabolic process
(2E)-butenoyl-CoA hydratase activity
folic acid transport
sperm-egg recognition
HERVL40-int
3-alpha-hydroxysteroid 3-dehydrogenase [NAD(P)+] activity
folic acid binding
LTR3
carbonyl reductase (NADPH) activity
MER68
HERV3-int
MER11D
DNA-binding transcription repressor activity, RNA polymerase II-specific
retinal metabolic process
response to interferon-alpha
response to interferon-beta
MER92B
arachidonate 11,12-epoxygenase activity
arachidonate 14,15-epoxygenase activity
MER84-int
oxaloacetate tautomerase activity
flavone metabolic process
retinoic acid binding
LTR33A_v
transmembrane signaling receptor activity
positive regulation of immune complex clearance by monocytes and macrophages
RNA polymerase II preinitiation complex assembly
MLT1N2
MER70B
immune response-inhibiting cell surface receptor signaling pathway
MLT1E3
LTR84b
cyclosporin A binding
MSTB1
MLT1A0
MLT1D
LTR42
negative regulation of fatty acid metabolic process
LTR16D2
MLT2B2
immune receptor activity
transcription factor TFIID complex
LTR14
inhibitory MHC class I receptor activity
RNA polymerase II general transcription initiation factor activity
MER66C
ERVL-E-int
interleukin-10-mediated signaling pathway
menaquinone catabolic process
virion attachment to host cell
MHC class Ib protein complex binding
complement binding
peptide antigen transport
positive regulation of apoptotic cell clearance
natural killer cell lectin-like receptor binding
HERV16-int
translation activator activity
LTR85a
3'-UTR-mediated mRNA stabilization
classical-complement-pathway C3/C5 convertase complex
intracellular transport of virus
bitter taste phylloquinone receptor activity
catabolic process
positive regulation of translational initiation
detection of chemical stimulus involved in sensory perception of bitter taste
sensory perception of taste
icosanoid metabolic process
